SUMMARY

Detail-oriented and proactive final-year Information Technology student with a strong foundation in backend development using Java and Python. Skilled in web technologies with excellent written and verbal communication skills. A strategic thinker and problem-solver who thrives in fast-paced environments, takes ownership of tasks, and consistently meets deadlines. Team-oriented with a focus on process improvement, efficiency, and delivering impactful solutions.

EDUCATION

Calcutta Institute of Engineering and Management, Kolkata

B.Tech in Information Technology

Expected Graduation: June 2025 **CGPA:** 8.67

Coursework: Data Structure, Software Engineering, Databases, Networking, Object Oriented Programming, Algorithms, Operating Systems

National Gems Higher Secondary School

Year of 12th Graduation: 2021

Stream: Computer Science - **ISC:** 92.16% | **ICSE:** 93.25%

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, C, SQL, Python

Web Development: HTML5, CSS3, React.js, Node.js, Express.js, MERN Stack, REST APIs

Databases: MySQL, MongoDB

Tools & Frameworks: Git, GitHub, Visual Studio Code, IntelliJ IDEA, Postman, Microsoft Office (Word, Excel, PowerPoint)

PROJECTS

• OtakuBase API

Tech Stack: Node.js, Express.js, MongoDB

- Developed OtakuBase, a RESTful API using Node.js and Express.js to manage and retrieve anime-related data efficiently.
- Designed endpoints for CRUD operations on anime, supporting attributes like genres, ratings, and seasons.
- Integrated advanced filtering and sorting features for personalized anime searches.
- Implemented JWT-based authentication for secure access and role-specific functionality.
- Optimized MongoDB queries for fast and reliable data retrieval.

• CrimsonSync - E-blood Bank Web Application

Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js)

- Developed a full-stack platform connecting blood donors and recipients, featuring search filters by blood type, location, and emergency need.
- Implemented secure user registration and login with JWT authentication for session management and anonymous communication between users.
- Created features for users to request blood, manage donations, and track blood donation camps and events.

TRAINING AND CERTIFICATIONS

• Robotic Process Automation

September 2024

- Developed expertise in RPA using UiPath and completed projects in web automation, PDF automation, and Excel automation.
- Gained proficiency in data scraping, data entry automation, RE framework, and data manipulation.

• Excel: Essential Statistics for Data Analysis using MS Excel

July 2023

- Gained skills in Excel, descriptive statistics, probability distributions, and hypothesis testing.
- Applied statistical techniques to real-world projects, improving decision-making.
